

Bottle Gourd Weather Dataset

BAMIS Source-Verified - Bangladesh

Verified against the numeric regional Bottle Gourd crop-weather PDFs supplied in the Drive folder.

343 uploaded rows matched source PDFs exactly; 39 valid Cumilla rows were added.

Final coverage: 9 Bottle Gourd regions, Rabi and Kharif seasons, 382 rows total.

Khulna was excluded because that file is Pointed Gourd, not Bottle Gourd.

The placeholder-heavy master Bottle_Gourd_.pdf was not used as numeric ground truth.

No synthetic, interpolated, or gap-filled values were added.

Bottle Gourd Crop Weather: Barisal

Verification Audit

Original uploaded dataset:	343 weather rows across 8 valid Bottle Gourd regional PDFs.
Row-by-row comparison:	All 343 uploaded weather rows matched their corresponding regional PDF values exactly for week, rainfall, temperatures, humidity, sunshine, wind direction and w
Cumilla correction:	The uploaded workbook said Cumilla had no usable numeric table. That was incorrect. The Cumilla PDF contains numeric Rabi and Kharif tables; 39 source-faithful
Final row count:	382 rows = 343 verified uploaded rows + 39 Cumilla rows.
Khulna file:	Excluded because bottle_gourd_khulna.pdf is explicitly a Pointed Gourd calendar, not Bottle Gourd.
Master Bottle_Gourd_.pdf:	Excluded as numeric ground truth because it contains placeholder 'Data' cells rather than observations.
Synthetic/interpolated values:	None added. Values are copied from the numeric regional source PDFs; no gap-filling or inferred corrections were made.
Region naming:	Chittagong -> Chattogram and Jessore -> Jashore normalized to the source PDF titles.
