

Jute Weather Dataset

BAMIS Fully Corrected - Bangladesh

Original workbook: 208 rows across 8 district-style names.

Directly comparable rows: 124; exact full-row matches: 0.

Mismatched weather cells found in comparable rows: 1229.

Corrected dataset: 187 rows = 11 BAMIS regions x 17 source weeks.

All corrected weather values were transcribed from the supplied regional BAMIS-format PDF tables.

No synthetic, interpolated, averaged, or duplicated district-level rows were added.

Verification Audit

BAMIS crop verification:	Jute is listed in the official BAMIS Crop Weather Calendar.
Supplied official-format regional PDFs:	11 regions: Barishal, Bogura, Cumilla, Dhaka, Dinajpur, Faridpur, Jashore, Khulna, Mymensingh, Rajshahi, Rangpur.
Original workbook rows:	208 rows across 8 district-style names, 26 rows each.
Comparable original rows:	124 rows could be directly mapped to a BAMIS region and an official source week.
Exact matching comparable rows:	0 of 124 comparable rows matched all 10 weather fields.
Mismatched cells:	1229 weather cells differed from BAMIS source values in those comparable rows.
Major structural mismatch:	Original file uses 26-week district-level repeated patterns. BAMIS regional Jute calendars contain 17 source weeks per region and the week ranges vary by region.
Corrected coverage:	187 rows = 11 regions x 17 source weeks.
Correction method:	Rebuilt directly from each regional PDF numeric table. No interpolation, averaging, synthetic extension, or district duplication was used.
Synthetic/interpolated values:	None added.
